

Description

Barcoded universal primer plate v2 is a 96-well plate containing barcoded primers. Each well on the plate contains a primer pair consisting of forward and reverse primers having the same barcode. Each barcode is present in only one well for a total of 96 different barcodes on the plate. Each primer has a universal sequence on the 3' end to allow for incorporation of barcodes into templates through a two-step PCR strategy. Primer concentration is 2 μ M total in a volume of 6 μ L.

Kit configuration

Configuration

#	Component	Part number	Qty	Color	Volume
1	Barcoded universal F/R primers 96	101-638-200	1	N.A	6 μ L

Quantities

96 reactions

Storage and handling requirements

Product should be stored at -20°C.

Refer to protocols for additional recommendations for reagent handling.

Shelf life

Refer to expiration date on kit label.

Intended use

Research use only. Not for use in diagnostic procedures.

Support

For additional product and technical information, such as safety data sheets (SDS) or procedures, visit our [website](#).
